

Wishbone Safety, Inc.

A revolutionary new safety device for aerial work!

“The Ultimate Fall Protection for Personnel Transfers”

A “Y” Lanyard that allows 100 % fall protection between your aerial lift platform and the stationary work location.

- While making a transfer from an aerial lift platform to your fixed work location structure.
- In the event of an unintended aerial lift platform movement or malfunction.

The red leg of the “Y” lanyard automatically releases in an emergency leaving the worker safely secured to the stationary structure.

The Original Model P.E.R.T.S.:

The Wishbone Model PERTS “Y” Device with an Emergency releasable Leg.

The double locking snap swivel is attached to the body harness and the two legs have “D” rings to which you can attach various Positioning Lanyards, restraints, various Double Locking Hooks, Carbineers, and Shock Arresters to suit your specific application. This is the unit that is providing true 100% Fall protection for Aerial Workers with actual saves!
